

KRYNA Inter Connect Cable Inca series

Inca 7 ZET WIRING

~The pinnacle of the Inca series. To a Holographic World that boasts of infinite possibilities.~

The Flagship model of the Inca series.

A treasured weapon, this cable is for those who know the true pleasure of surpassing the boundaries of music into Holographic Sound where music transforms from mere listening to an entire physical experience.

It has a never before achieved S/N, fitting of the flagship title, and a rare resolving power is drawn out.

The Inca 7 was developed by aiming to somehow erase the existence of interconnect.

In order to communicate without losing even the slightest spatial information, and to communicate the analog oscillations with every frequency's signal included without loss, we put together a 6-core structure, the greatest of the series, by intricately combining European "Ultra Fine Wires" that were specially selected by KRYNA from the numerous wires possible for the wires that sustain the heart of the cable.

Further, the core is surrounded by KRYNA's proprietary shield technology "Double Shielding Tornado Structure" that protects the delicate signals so music signals are double covered.

The sound that comes through when noise, a big stress, is wiped away will make you feel like you travelled through time and space into an expanding world free of stress.

Come rid yourself of the walls that couldn't be cleared away until now, and together let's earnestly pursue the emotional experience that is new sound.

Inca 5 ZET WIRING

~What is the real value of Interconnect? KRYNA's challenge, changing your standards.~

The Standard in the Inca series.

A strategic model from Inca's challenge to redefine the very root of what interconnect has been up to this point.

The cable's core is sustained by the same Ultra Fine Wires as the Flagship model.

The core, comprised of 4 stems of these wires, is protected from noise with a double-layer shield and the "Double Shielding Tornado Structure" is applied generously.

A bold item that makes actually feeling the standard level of KRYNA possible.

Break down the boundaries between audio and music to obtain your right to feel the presence of the performer right there with you and let the unseen soundstage flood your room.

Inca 3

~Feeling more simply, and intensely~

Though it is the Entry model in the Inca series, it has inherited from the series' upper models with a core that is made up of the same materials into a double core structure incorporating the minimum required components for interconnect allowing it to accomplish the 3 tasks of Inca in a simpler manner.

Using a cable that has no mechanical dependence we are able to, for the first time, know the individuality and uniqueness of machines.

For those who want to feel music directly, and for those who want to expand their enjoyment of music going forward, we recommend using the Inca 3 as a reference.

RCA Plugs

Specifications

	Inca 7	Inca 5	Inca 3
Conductor Composition	High Purity Annealed Copper Wire		
Structure	ZET WIRING 3 Cores + 3 Cores	ZET WIRING 3 Cores + 1 Core	2 Cores
Number of Cores	6 Cores	4 Cores	2 Cores
Insulation	PVC, Cotton Yarn		
Shield	Double Shielding Tornado Structure		
Sheath	PVC Sheath (wire direction marked with arrows)		
Outside Diameter	8.50 ±0.6mm Ø	8.30 ±0.6mm Ø	6.80 ±0.6mm Ø
Plug	(RCA) Coaxial Jack Type		
Pin	24-carat Gold Plated		

ZET WIRING

Kryna's ZET WIRING technology, noise that gets mixed in is taken out and the signal is purified. To convey sound without losing any of the information, the energy contained in sound, is a big step toward Holographic Sound regeneration.
